NOZOMI NETWORKS

DATA SHEET

Central Management Console

Centralized OT and IoT Security and Visibility for Distributed Sites

Nozomi Networks **Central Management Console**™ (CMC) delivers centralized OT and IoT security management – no matter how large or distributed your business is.

Whether you're consolidating visibility and risk management at the edge or in the cloud, the CMC is fast and simple to deploy.
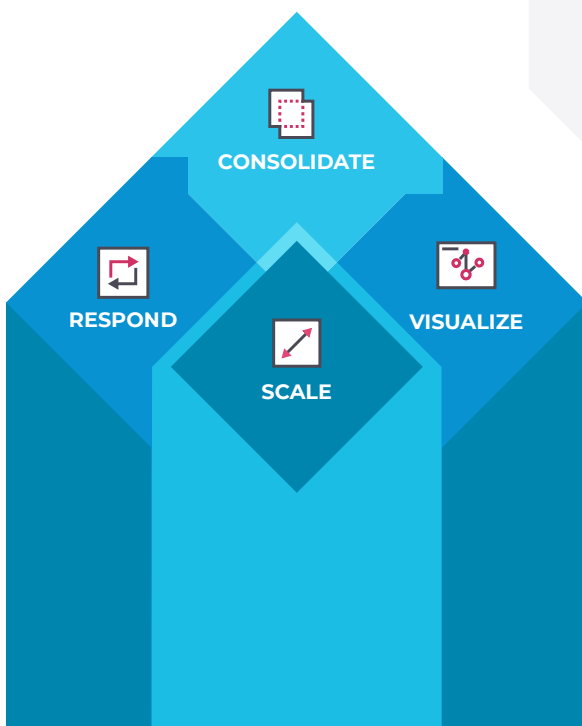

CONSOLIDATE

RESPOND

SCALE

VISUALIZE

See

What's on your networks and how they're behaving

Detect

Cyber threats, risks and anomalies for faster response

Unify

Security, visibility and monitoring across all your assets

Consolidate

Unified OT, IoT and IT Security

Centrally Monitor Your Distributed Sites

Single Console Access from the Cloud or at the Edge

Delivers aggregated summaries with drilldown to detailed information by site

Answers questions fast with powerful queries about any and all OT/IoT data

Deploys in the cloud (AWS or Azure), or at the edge, for anytime, anywhere access

Enterprise OT/IoT Risk Monitoring

Maps your **Guardian**™ appliances and shows risk level by site

Delivers fast insight into key metrics, alerts, incidents, vulnerabilities and more

Manages Nozomi Networks appliances and services

Easily Streamline SOC/IT Workflows

Unified Security Monitoring

Integrates quickly with asset, ticketing & identity management systems, and SIEMs

Streamlines security processes across IT/OT and harmonizes security data

nozominetworks.com/integrations

Enterprise-level Best Practices

Leverages enterprise single sign-on (SSO) credentials for fast access to OT and IoT information

Provides deep role-based access control (RBAC) "least privilege" permission options for maximum security
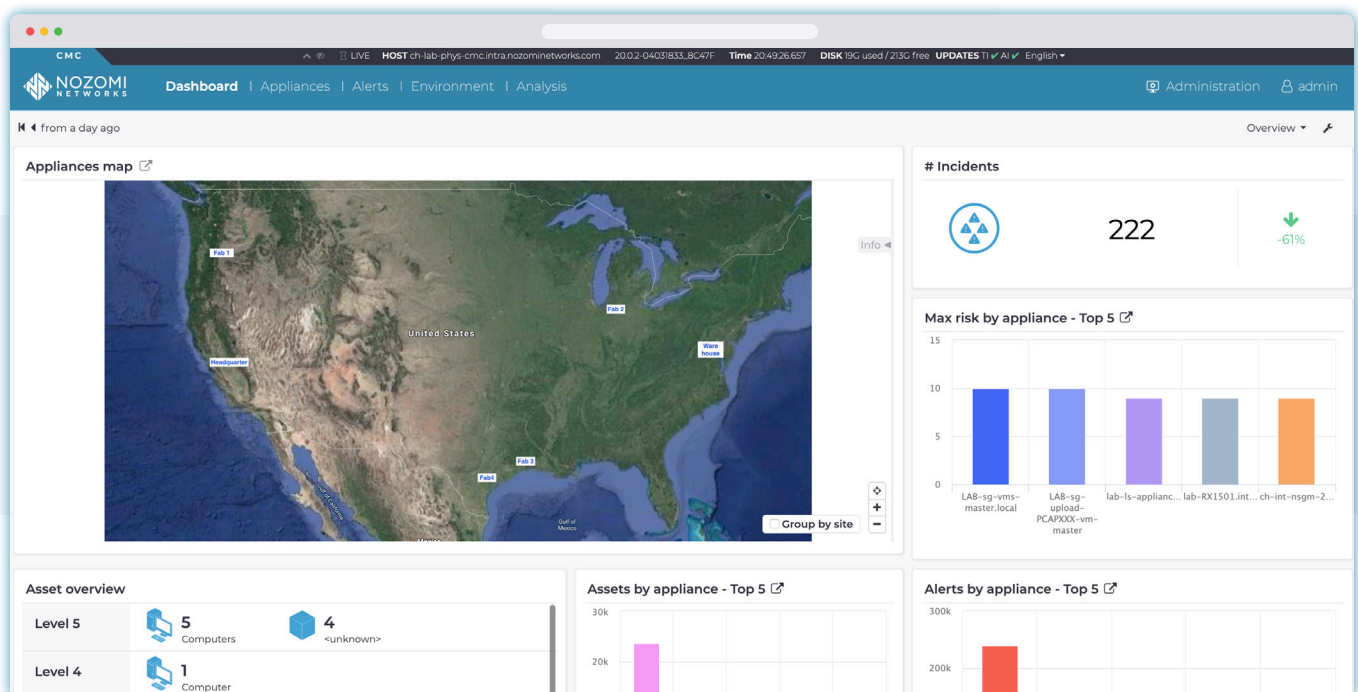

The **CMC** showing a geographic map of your Guardian appliances.

Visualize
Enterprise-wide Visibility

Instantly See Your Networks

Real-time Network Visualization

Delivers instant awareness of OT/IoT networks and their activity patterns

Captures key data such as traffic throughput, TCP connections, protocols used between zones and more

Accelerates incident response and troubleshooting efforts

Flexible Navigation and Filtering

Shows macro views of multiple sites, individual sites and detailed information on nodes and connections

Filters by subnet, type, role, zone and topology

Groups assets visually, in lists and detailed single asset views

Quickly Know Your Assets and Their Risks

Summarized Asset Information

Aggregates asset inventories that are automatically generated by Guardian at each site

Provides key information such as:
- OT asset inventory
- IoT asset inventory
- Vulnerabilities by asset type, vendor or location

Drilldown to Individual Assets

Enables access to local Guardian appliances and individual asset details, such as:

- Operating system
- MAC vendor
- MAC address
- Installed software
- Vulnerabilities
- Captured URLs/files
- IP
- Subnet
- Zone
- Role
- Alerts
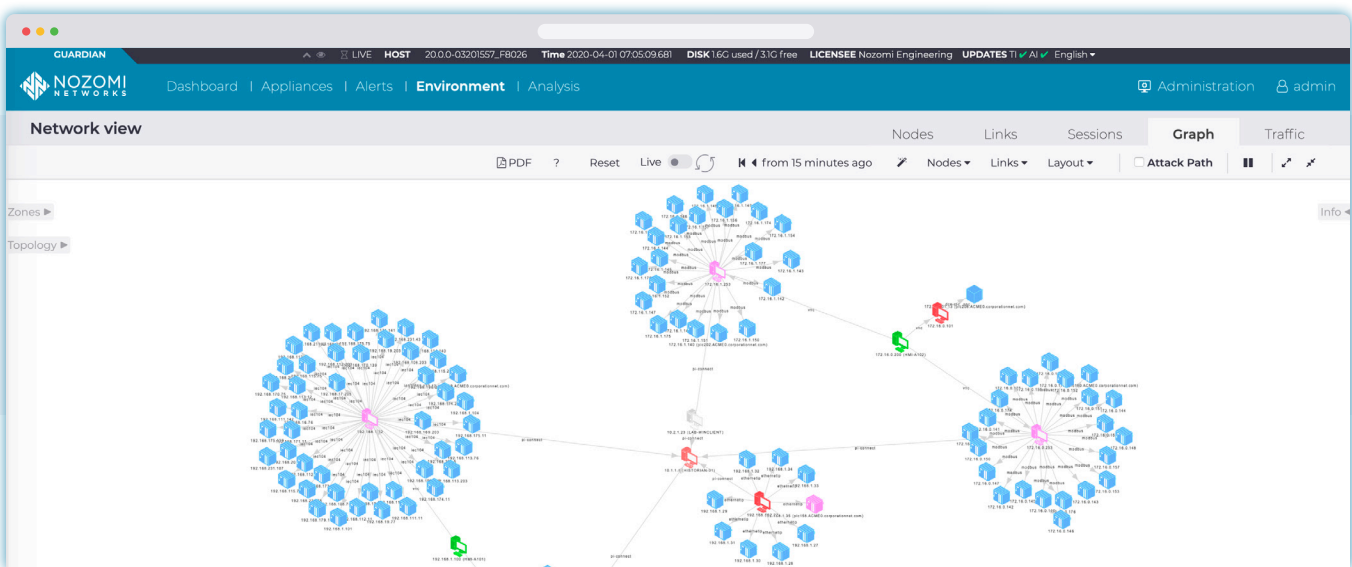

Portion of interactive **Network** Visualization **Graph**.

Respond

Time-saving Threat Summaries and Forensic Tools

Rapidly Respond to OT and IoT Risks

Detect and Disrupt Emerging Threats

Aggregates cybersecurity and process reliability threats

Reports attacks in process, reducing the mean-time-to-detection (MTTD)

Consolidates vulnerability assessment across sites

Unified OT and IoT Threat Detection

Combines behavior-based anomaly detection with signature-based threat detection for complete coverage

Integrates quickly with ticketing systems and SIEMs for streamlined security processes

Optimize Troubleshooting and Forensic Efforts
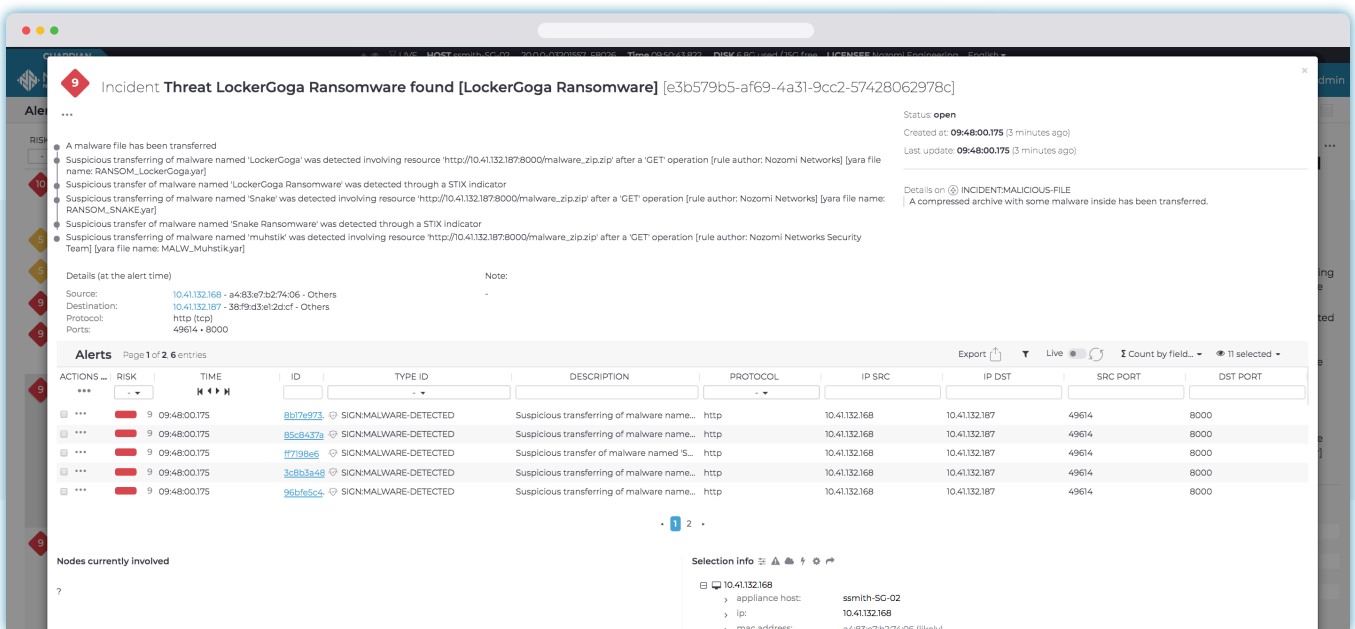

Powerful Tools for Fast Analysis

Decodes incidents with Time Machine™ before and after system snapshots

Provides fast answers with a powerful ad hoc query tool

Smart Incidents Speed Forensicss

Decreases response time with Smart Incidents™ that:
· Correlate and consolidate alerts
· Provide operational and security context
· Supply automatic packet captures

Smart Incident showing related alerts and security context.

Scale

Unified Security for Thousands of Distributed Sites

Attain High Performance for Multinational Deployments

Centralized Monitoring of OT Risks

Consolidates information for thousands of sites and devices

Quickly scales for enterprise-wide deployment with optimum performance

Adapts to all sites, with multiple appliance models and flexible deployment options

High Availability, High Security

Ensures continuous OT and IoT monitoring with high availability and multitenant CMC configurations

Connects with field appliances using encrypted, bandwidth-optimized data transfers

Realize Rapid Time to Value

Swift Deployment

Installs as a proven, plug-and-play, ISO 9001: 2015 certified product

Deploys in the cloud on AWS or Azure, and at the edge on virtual and physical appliances

Rolls out to numerous sites within weeks

Immediately Valuable

Improves visibility, cybersecurity and reliability

Integrates with existing tools and workflows for fast adoption and high productivity

Accelerates IT/OT collaboration

Sample deployment map for centrally monitoring and securing many facilities.

Flexible Deployment and Licensing

Industrial Strength OT and IoT Security and Visibility

You can deploy the Nozomi Networks solution in a wide variety of mixed environments for rapid asset discovery, network visualization and accelerated security.
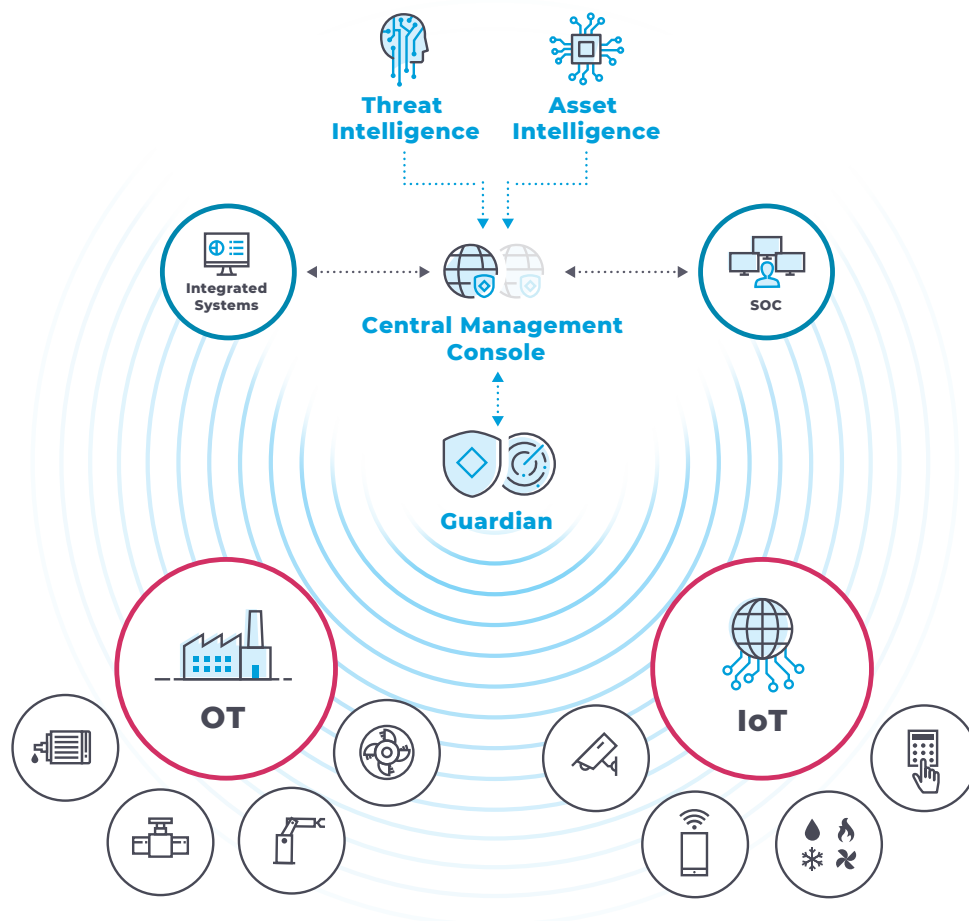

Multiple Licensing Options

Nozomi Networks offers a range of licensing options to fit your organization's preferences, including:

· **Subscription licenses**
· **Enterprise license agreements (ELAs)**
· **Perpetual licenses**

Please contact your Nozomi Networks Sales Director for more information.

Sample **Deployment Architecture**

Purdue Model Example

You can tailor the Nozomi Networks solution to meet your needs by utilizing its flexible architecture, extensive range of appliances, and integrations with other systems.
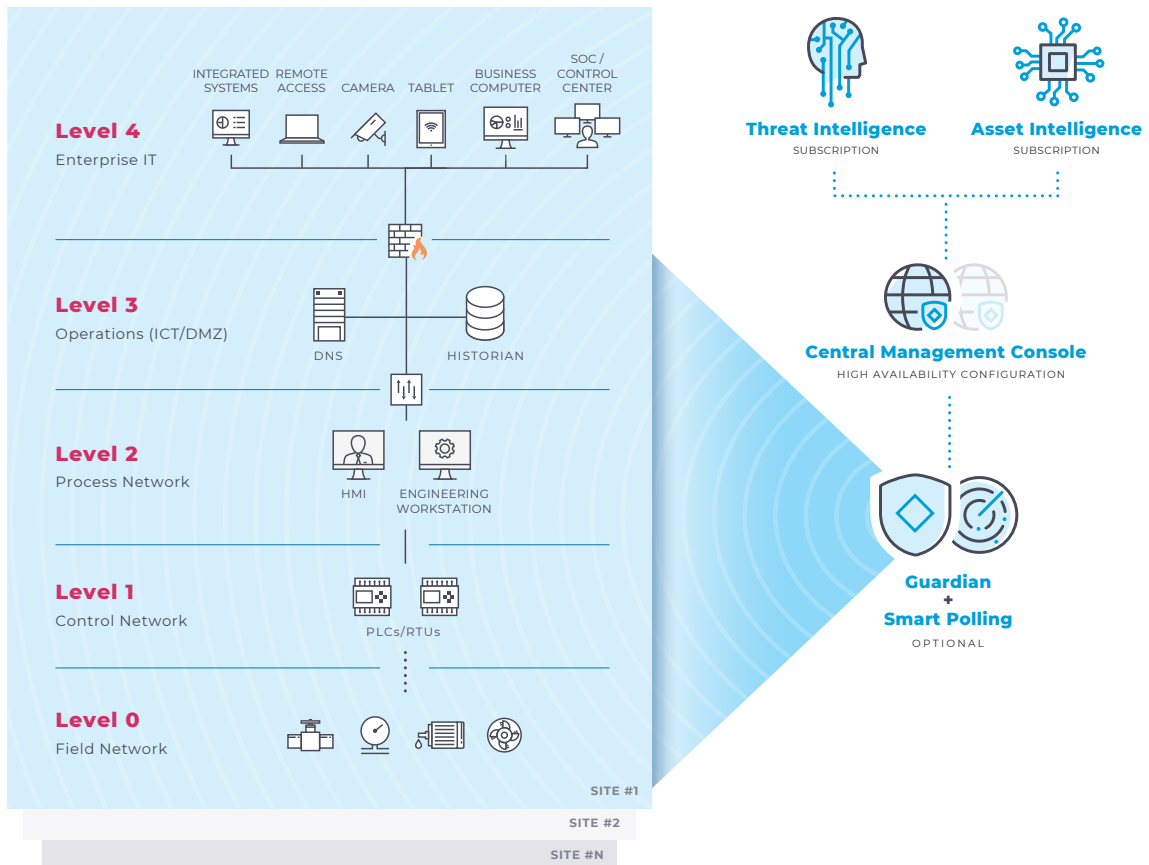

World Class Partners

Nozomi Networks partners deeply with the IT/OT services and technology companies you trust. These include:

· **Strategic alliances** with enterprise IT and managed security providers
· **Technology integrations** with leading IT/OT solutions
· **SI/VAR relationships** with 250+ prominent organizations around the world

Visit **nozominetworks.com/partners** for more information.

CMC Appliances
in the Cloud or at the Edge

Cloud or Virtual

Virtual appliance for centralized management of multi-tier, distributed deployments.

◆ **Unlimited Max. Managed Appliances***

	Virtual Central Management Console
Deployment Options - Cloud	Amazon AWS and Microsoft Azure
Deployment Options - Virtual	Hyper-V 2012+, KVM 1.2+, VMware ESX 5.x+, XEN 4.4+
Max. Managed Appliances	Unlimited *
Storage	100+ Gb

* Based on the infrastructure

NCMC-100 Series

Rack-mounted appliance for centralized management of multi-tier, distributed deployments.

◆ **50 Max. Managed Appliances**

	NCMC-100
Max. Managed Appliances	50
Max. Throughput	1 Gbps
Managment Ports	4x1000BASE-T
Expansion Slots	Not available
Storage	256 Gb
Form Factor	1 rack unit
Max. Power Consumption	360W
Power Supply Type	100-240V AC - 50/60 Hz
Temperature Range	0 / +45 °C
HxWxL (mm/in)	44 x 429 x 438 / 1.73 x 16.89 x 17.24
Weight	14 kg

For complete and current tech specs, visit: **nozominetworks.com/techspecs**, or contact us.

Multiple Deployment and Support Options

Here are several options for deployment and support assistance:

· **Nozomi Networks Global Strategic Alliance Partners**
· **Nozomi Networks SI/VARs**
· **Nozomi Networks Professional Services**
· **Nozomi Networks Global Customer Support**

Products and Services

PRODUCT
Guardian

Guardian provides industrial strength OT and IoT security and visibility. It combines asset discovery, network visualization, vulnerability assessment, risk monitoring and threat detection in a single solution. Guardian accelerates security and simplifies IT/OT convergence.

PRODUCT
Central Management Console

The Central Management Console (CMC) consolidates OT and IoT risk monitoring and visibility across many distributed sites, at the edge or in the cloud. It integrates with IT security infrastructure for streamlined workflows and faster response to threats and anomalies.

SUBSCRIPTION
Threat Intelligence

The Threat Intelligence subscription delivers ongoing OT and IoT threat and vulnerability intelligence. It helps you stay on top of the dynamic threat landscape, and reduce your mean-time-to-detection (MTTD).

SUBSCRIPTION
Asset Intelligence

The Asset Intelligence subscription delivers ongoing OT and IoT asset intelligence for faster and more accurate anomaly detection. It helps you focus efforts and reduce your mean-time-to-response (MTTR).

GUARDIAN ADD-ON
Smart Polling

Smart Polling adds low-volume active polling to Guardian's passive asset discovery for enhanced asset tracking, vulnerability assessment and security monitoring.

GUARDIAN ADD-ON
Remote Collectors

Remote Collectors capture data in remote, distributed locations and send it to Guardian for analysis, improving visibility while reducing deployment costs.

Nozomi Networks

The Leading Solution for OT and IoT Security and Visibility

Nozomi Networks is the leader in OT and IoT security and visibility. We accelerate digital transformation by unifying cybersecurity visibility for the largest critical infrastructure, energy, manufacturing, mining, transportation, building automation and other OT sites around the world. Our innovation and research make it possible to tackle escalating cyber risks through exceptional network visibility, threat detection and operational insight.
